		User Story 3 — Meeting Preparation (Relationship Manager) As a **UBS relationship manager**, I want to **view upcoming client meetings scheduled through the chatbot**, so that **I can prepare the relevant portfolio insights and discussion points**.

*How account management differs in wealth mgmt VS retail banking:

Common account types

1️⃣ **Cash accounts (settlement accounts)**
Used to:

- hold liquid cash
- settle investment trades
- receive dividends or interest
- fund transfers to other accounts

Example flow:

1. Client sells stocks
2. Money goes into **cash settlement account**
3. Client can withdraw or reinvest

2️⃣ **Multi-currency accounts**
Wealth clients often hold several currencies:

- USD
- CHF
- EUR
- SGD
- GBP

Example use case:

Client sells US stocks → proceeds stay in USD account → avoids FX conversion.

3️⃣ **Investment / custody accounts**
These accounts **hold the client's securities**.

Assets stored:

- stocks
- bonds
- ETFs
- funds
- structured products
- alternatives

The bank **safekeeps the assets** and manages reporting.

What “account management” means in wealth banking

Typical services:

- portfolio value tracking
- asset allocation breakdown
- transaction history
- dividend payments
- account statements
- tax reporting

*Credit Cards for Wealth Clients

Features of wealth banking credit cards

Compared to retail cards, they often have:

- **very high credit limits**
- travel privileges
- concierge services
- luxury rewards
- airport lounge access
- better FX rates
- integration with investment accounts

Some clients may even have **asset-backed credit lines** linked to their portfolio.

Example

A client with **$5M invested with UBS** might receive:

- a **premium credit card**

- a **$200k+ credit limit**
- the ability to repay using funds from investment accounts

What the chatbot could do

Example features:

1️⃣ **Credit card transactions**
User:

> “What did I spend on my card this week?”

2️⃣ **Credit limit enquiries**
User:

> “What is my available credit?”

3️⃣ **Expense summaries**
User:

> “How much did I spend on travel this month?”
